AmeriPrep Solutions © LLC, releases Financial GPS 2.1.

PR9.NET May 19, 2008 - Grand Rapids, MI – AmeriPrep Solutions © LLC, announced today that its computer software, Financial GPS © 2.1, is available for sale to the general public.

Since its inception in 2007, Financial GPS © has provided users the ability to identify financial objectives in the privacy of their own homes. With the help of educational video tutorials, Financial GPS © allows users to plan for retirement, identify debt pay-off tactics, and track spending and saving habits. It focuses on fiscal responsibility and promotes proper budgeting and saving to help users reach specific goals. "Will I outlive my money? Will I have to change my lifestyle upon retirement? These are questions many Americans ask themselves and this software provides them with the answers," stated director of sales, Brian Bartholomew.

AmeriPrep Solutions © believes people need to be educated and shown how things like credit card debt can be dangerous to their long-term financial goals. "There are too many people that are accustomed to asking what the 'monthly payment' is as opposed to how much a product actually costs," quoted vice president of sales and marketing, Chris Yonker. "Offering a tool that teaches financial literacy has been our objective since day one. Financial GPS © is the perfect tool," said Steve Eilers, vice president of information systems.

The AmeriPrep Solutions © founders believe Financial GPS © is the tool to promote financial literacy and is hitting the market at the right time and in the right place.

The English/Spanish version of the software is available in hard copy or for download via the website www.ameriprepsolutions.com.

AmeriPrep Solutions © is a Grand Rapids, Michigan based corporation. Their flagship product was designed to help bring a conscious awareness to each individual's financial situation.
