Veramar Naval Products – Better Website, More Prints!

PR9.NET May 22, 2008 - Richmond, Va. – Veramar Naval Products has just introduced a new website design that is more user-friendly than ever. Check out www.veramarnavalproducts.com to view the latest arrivals, as this list will be frequently updated.

Veramar Naval Products and BeSprout SEO have collaborated to develop Veramar's newly designed website. Veramar Naval Products specializes in both historical naval ship prints, coast guard art, army and military prints and also music art prints and rock n roll art. Veramar offers gallery-quality collector prints on fine artist canvas, utilizing the unique Giclee approach. Giclee-style (French for "Spray of Ink") produces museum-quality prints that cannot be duplicated by any technique. Veramar selects high-resolution printers and archival inks and then crafts each print individually in order to assure that the print will last for many generations.

BeSprout SEO, a Richmond-based firm, provides businesses with a low-cost strategy for marketing on the web. BeSprout's in-house team of search engine specialists, computer programmers, graphic designers, and copywriters strives to help a business grow by increasing the exposure, traffic, and understanding of its website. BeSprout and Veramar have worked together to ensure that customers can find their perfect prints quickly and easily.

Visit Veramar's website now to get the most updated list of available prints. You can conveniently register an account online to view your shopping basket and securely checkout. Whether you are seeking military pictures, navy ship art, or legends of rock, Veramar can supply the print that matches your interest.
