Former Polycom executive brings 20+ years of telecom and data communications sales leadership experience to newly created role.

PR9.NET June 02, 2008 - USA/MIDDLETON, WI – Network Engineering Technologies, Inc. (NET), a nationwide project management consultant and integrator of voice, data and video infrastructures, today announced the appointment of John R. McMahon as Senior Vice President of Sales, Marketing and Business Development. McMahon will be responsible for all aspects of NET's national sales and marketing activities including account management and channel partner relationships. He will report directly to Gary Czubak, Executive Vice President and General Manager of NET.

McMahon most recently served as VP of U.S. Markets for Polycom, Inc. (Nasdaq:PLCM) where he was responsible for 28% of the company's worldwide revenues. McMahon consistently exceeded yearly revenue sales goals with his sales teams delivering the highest revenues per head worldwide.

"John brings an extensive background in the IT infrastructure industry with a demonstrated record of success in leading and overseeing sales efforts with leading network solutions' companies," stated Mr. Czubak. "We're pleased to welcome John to our executive management team here at NET. We are confident in his abilities to continue to grow our sales team, strengthen current accounts and develop key partnerships through streamlined sales and marketing programs for our convergence solutions."

"I'm very excited about joining such a dynamic company in a market that provides unlimited growth opportunities," said Mr. McMahon. "I'm extremely proud to become a member of NET's leadership team which has demonstrated its commitment to invest in resources, products and programs in order to grow its market share and expand its leadership position."

Prior to joining Polycom Inc., McMahon's experience spanned a variety of strategic sales management and leadership roles with companies including Cisco Systems, Coppercom, The Wollongong Group and Vertical Networks.

###

About Network Engineering Technologies
