

Announcing Intertek's Wired vs. Wireline Webinar

Intertek, June 03, 2008

URL: <http://www.pr9.net/comp/mobile/8307june.html>

Learn how to conquer EMC Challenges in both Wired and Wireless Applications.

PR9.NET June 03, 2008 - Boxborough, MA, – Intertek, an industry leader that specializes in electrical product safety, EMC, wireless and benchmark performance testing, today announce a thought leadership webinar titled; Conquering the EMC Challenges in both Wired and Wireless Applications.

"The exponential growth of telecom devices is colliding with bandwidth limitations. This, along with constantly changing regulatory requirements, has created challenges for the engineering community," stated Roland Gubisch, Chief EMC Engineer, Intertek and presenter of the webinar.

Today, performance concerns range from handset and GPS sensitivity to hearing aid compatibility (HAC) for cellular and portable phones. This webinar offers an overview of EMC, touching on standards and issues associated with the highly dynamic wired and wireless application landscape.

The webinar has been designed for quality managers, testing engineers, telecom engineers and managers. As a result of attending this webinar, you will learn the myths and realities of regulatory response and EMC performance issues as they relate to the wired and wireless market.

This one hour presentation will take place on Thursday, June 5, 2:00pm ET.
