*Younified Comms delivers innovation and choice to the Business Email marketplace with a World First multi-currency payment option available in 190 countries and 16 different currencies.*

PR9.NET June 22, 2008 - London, England – Aimed at small to medium businesses the World's first multi-currency Email service allows personal businesses to gain global advantage and economies of scale with the local payment options they need.

A study by the Radicati Group, Inc, states that by 2009 there will be in excess of 250 million Email mailboxes being used by businesses employing less than 100 people. At the same time more than 280 billion Email messages will be distributed globally every day. Microsoft Exchange is estimated to have a market share of 35%, IBM 20% and the rest shared amongst other email services.

Graham Gardiner, Chief Executive, Younified Comms, said "Email is a critical tool for personal businesses and significantly it's one which they can use at the same cost and benefit ratio that much larger businesses enjoy. Younified Comms specializes in Business Email and Unified Communications and is bringing innovation, the first being a multi-currency payment option available in 190 countries and 16 different currencies. Small to medium businesses, or personal businesses, are the heart-beat of a successful global economy and we'd encourage them to investigate and deploy local solutions with global scale at a low price in the currency of their choice."

For additional information on the World's first multi-currency business Email service visit <http://www.younifiedcomms.com>.
