Team Double-Click, the nation's largest virtual staffing firm announces launch of new ground-breaking Licensed Virtual Assistant program. The new program set to start on July 8, 2008, provides business opportunities to work virtually outside of the normal 9-5 corporate job.

PR9.NET June 25, 2008 - Ouray, Colorado – There are daily warnings throughout the media of how we're damaging the environment with options on how to help the earth are widespread. Everyone seems to be "going green". Hybrid cars, canvas bags vs. plastic bags, energy efficient light bulbs, you name it, there's a way to go green. Team Double-Click® now has an option for individuals to "go green" while making an income from a home-based business.

Under the new Team Double-Click® Licensed Virtual Assistant program, virtual assistants can opt to pay a flat monthly fee to be licensed by Team Double-Click®. Licensing will allow virtual assistants to use the Team Double-Click® name, brand, logo, and marketing messages to obtain their own clients rather than wait for Team Double-Click® to find clients for them. In growing their virtual assistant business, a Licensed Virtual Assistant will have the ability to perform the work themselves or to earn supplementary income by placing clients with Team Double-Click's® highly trained support-level virtual assistants.

Licensed Virtual Assistants will have access to numerous Team Double-Click® services including, but not limited to: their own Team Double-Click® website, a Team Double-Click® phone extension through the company's toll free phone number, invoicing completed by the company, use of a Team Double-Click® email address, use of the Team Double-Click® Virtual Office program to keep track of their time and share files with their clients, access to tens of thousands of highly trained support-level virtual assistants, continuing education opportunities, inclusion in the Team Double-Click® annual conference, and the backing of the premier and original virtual staffing agency in the industry.

Team Double-Click® created the Licensed Virtual Assistant program as an option to grow a home-based business, in part to help the environment. A gallon of gasoline is assumed to produce 19.4 pounds of carbon dioxide (CO₂), a greenhouse gas that damages air quality. Currently, Team Double-Click® virtual assistants, save a total of 787,349 pounds of CO₂ a year. That's more than 40,000 gallons of gasoline being saved a year.*

Team Double-Click® will launch the Licensed Virtual Assistant program on July 8, 2008 and will accept the 1st 200 applicants to apply and complete the interview process.

To find out more information about how to become a Team Double-Click® Licensed Virtual Assistant, visit http://www.teamdoubleclick.com/licensed_virtual_assistant.html or call 888.827.9129.
