A 400-year-old Chinese herbal remedy has just been proven to demonstrate significant fat burning properties which provides evidence to what keeps the Chinese population slim. This new herbal formula is now available in the West as a weight loss tea which allows users to maintain many of their original eating habits without having to go on a deprivation diet plan.

PR9.NET July 23, 2008 - Fort Wayne, IN - WeightLossTealInfo.com is releasing information on a powerful weight loss tea which has been proven to alter metabolism and assist in the shedding of stubborn pounds. This weight loss system called Nutraslim Pro is based on a 400-year-old Chinese herbal weight loss secret called wu-yi tea (also referred to as oolong).

The wu-yi / oolong weight loss tea produces a significant fat-burning effect in the body. The tea is made up of an exceptionally high natural concentration of compounds called polymerized polyphenols. These polyphenol compounds have been clinically proven to activate enzymes which cause triglycerides to dissolve. It appears that their effect on the body improves metabolism which facilitates weight loss. In essence, the drinking of two cups of Nutraslim Pro's wu-yi weight loss tea on a daily basis can have a very profound influence on one's weight. The tea assists your body in the shedding of stubborn pounds by boosting your metabolism, but it also blocks the fattening effects of carbohydrates.

The herbal secret behind this weight loss tea is believed to be a significant reason why Chinese men and women do not get fat. The tea has been highly touted by numerous celebrities including Oprah and featured prominently on Fox News, CNN, USA Today, etc.

The power of this weight loss tea lies in the fact that you can continue to eat carbohydrates and other foods that you love. Deprivation diets have been proven to not work. What works is a system to change your metabolism and accelerate your natural fat burning capabilities. The Chinese have long enjoyed the weight loss benefits of this system. Now the Nutraslim company hopes that many others will gain the health benefits of this knowledge.

Because the Nutraslim Pro wu-yi weight loss company is so confident in the weight loss results generated by the tea, they are offering a free 14 day sample with no risk. Now it appears that anyone worldwide can try the "secret" that the Chinese have known about for years -- and have nothing to lose (except the excess weight). <http://www.WeightLossTealInfo.com>.
