*Medical Billing Software .com today announced release of the service pack 1 of the popular Medisoft >Medical Billing Software program. Our medical billing software is being used by medical offices, chiropractic offices, mental health offices, physical therapy clinics, and other health care professionals.*

PR9.NET November 19, 2008 - The service pack addresses over 75 fixes and enhancements designed to improve the popular medisoft billing software version 14 released earlier this year.

Medisoft medical billing software program is a medical billing program, or practice management software program designed for medical billing, medical billing service, chiropractic billing, physical therapy billing, and mental health billing used by over an estimated 70,000 doctors nationwide.

This service pack release update addresses a number of areas in the medical billing software program including:

- 1- Additional report for Medisoft Advanced - Now the Patient Remainder Aging report, previously available only in Medisoft Advanced Network Professional.
- 2- Ability to specify NPI only data to be submitted to insurance carriers to prevent legacy PIN numbers and qualifiers from sending on paper or electronic medical claims.
- 3- Ability to setup default billing methods for Primary, Secondary and Tertiary insurance claims.
- 4- Custom aging buckets now works properly and allows you to specify starting # of days past due for each column. For example, you can start your aging at 31-60 days, then 61-90 days, etc.
- 5- Office Hours, the medical appointment scheduling software program included with Medisoft, now will change the phone number on all future appointments if you make a change to one of the appointments in the series.
- 6- Final Draft, the medical word processor included with Medisoft, now no longer shows a "beta" expiration notice.
- 7- Eligibility scheduled tasks has been corrected to allow you to schedule eligibility verifications after hours so that the complete list will be available to you in the morning when you arrive at the office.
