

# Dialog Solutions and HMS Software Announce a Strategic Alliance Partnership

Dialog Solutions, June 29, 2009

URL: <http://www.pr9.net/business/services/9349june.html>

*Dialog Solutions, a dynamic force in creating dialog-based user interfaces is very pleased to announce a strategic partnership with HMS Software, maker of the industry leading TimeControl timesheet system.*

*The cornerstone of the Dialog Solutions products and services is talia. talia is a simple and unique Instant Messaging (IM) interface that facilitates time capture and project status updates for end users.*

*It is a simple concept; what if everyone had their own admin assistant to fill in timesheets or status data for them. In this case, talia sits behind instant messenger dialogues with the user via instant messages and securely enters data into TimeControl for the user.*

PR9.NET June 29, 2009 - Working in partnership with HMS Software of Pointe-Claire, Quebec, Laval-based Dialog Solutions optimized talia and integrated it into the TimeControl application. talia's development team leader Louis Pellerin stated: "We were very pleased with the support and collaboration we received from the entire HMS team. It was productive and effective; we look forward to a long and mutually beneficial relationship."

Benefits for applications using talia include:

- A marked reduction in the time required for staff to log work
- A significant reduction in the number of employees who are 'data entry' challenged
- An increase in the accuracy of collected data
- Reduced costs related to timesheet follow-up and management
- An acceleration of the data collection process.

We are pleased to offer these benefits to the users of TimeControl.

"We are very pleased to be working with HMS Software. HMS has had a leadership position in time capture and project management for many years, and we appreciate the confidence and the support that they have shown for talia", said André Brissette, President of Dialog Solutions.

Chris Vandersluis, President of HMS Software, was pleased that "the talia system will allow TimeControl users to update and enter their timesheets through an instant messaging system or even from Smartphones like a Blackberry or Microsoft Mobile device".

For those interested in more information on talia and how it is integrated into TimeControl, HMS has created a solution site on the TimeControl website to show the systems working together. To visit the solutions page: [www.timecontrol.com/solutions/talia](http://www.timecontrol.com/solutions/talia).

## About HMS Software

Based in Montréal, Canada, with offices in Toronto, HMS Software has been a leading provider of project management and enterprise timesheet systems and services since 1984. HMS Software's first customized timesheet application was written in 1984. With the launch of TimeControl as a commercial application in 1994, HMS Software began servicing clients worldwide.

HMS Software's client list reads like a who's who of business. It includes Acergy, Alcan, the Atlanta Airport, the Canadian Business Development Bank, the City of Montréal, Ericsson, the Government of Saskatchewan, John Deere, Kelly Services, Koch, Lockerbie and Hole, Motorola, Organon, Parker Hannifin, Rolls Royce, Standard Life, Thompson Beta, Volvo Novabus and hundreds of others. For further information about HMS Software, please visit the HMS website at: [www.hmssoftware.ca](http://www.hmssoftware.ca).

## About TimeControl

TimeControl was originally released in 1994. It was immediately successful in the project management sector and today is recognized not only as a project management solution, but also as an enterprise timesheet solution in use by companies worldwide. TimeControl is designed to serve the needs of both Finance and Project Management simultaneously. It includes features such as flexible user structures to allow for multiple levels of timesheet authorization and an open data architecture, which makes the product ideally suited for integration with existing data systems in any organization. TimeControl's flexibility allows it to be deployed for use as a time and attendance, time and billing, project time and flex-time system. TimeControl has both a Web and Windows interface. For more information about TimeControl, visit: [www.timecontrol.com](http://www.timecontrol.com).

HMS has representatives or distributors in Argentina, Australia, Brazil, Canada, Czech Republic, Denmark, Finland, Ireland, Israel, Kenya, Malaysia, Mexico, the Netherlands, New Zealand, Norway, Russia, Saudi Arabia, Singapore, South Africa, Sweden, Thailand, the UK, and the U.S.

## About Dialog Solutions

Dialog Solutions is leading the IT industry in creating dialog-based user interfaces (DBUIs). Dialog Solutions provides virtual

assistants to complement a wide variety of enterprise software packages. DBUIs enhance the usability and data accuracy of applications while reducing operating costs. Interfaces from Dialog Solutions also increase user satisfaction and the effectiveness of information systems. For further information, please visit the Dialog website at: [www.dialogsolutions.com/talia](http://www.dialogsolutions.com/talia). Dialog Solutions is a joint-venture of Pyxis Technologies and GSoft Group.
